Professional Summary

IT Engineer transitioning into Full-Stack Web Development, currently architecting and independently developing secure, scalable web applications. Sole developer of TaskFlow Pro, a full-stack project in active development utilizing Node.js, Express.js, and MongoDB integrated with modern front-end technologies. Proficient in designing REST APIs and implementing robust security protocols, including JWT authentication and bcrypt password hashing. Combines professional infrastructure troubleshooting experience with continuous full-stack engineering upskilling to deliver reliable software solutions.

Professional Experience

JK Paper Mill

2025 - Current

IT Engineer

- Maintained network infrastructure to ensure reliable connectivity. Troubleshoot hardware and software issues to support seamless IT operations.
- Delivered technical support for employees on software applications to enhance user experience.

Education

2022 - 2026

Bachelor of Technology, Computer Science
Gandhi Institute of Advanced Computer and Research

Projects

TaskFlow Pro (In Progress), Built user authentication (Signup/Login), password hashing with bcrypt, JWT-based authentication, protected routes, frontend-backend integration using Fetch API, MongoDB integration with Mongoose, client-side validation, and REST APIs. Currently developing the Task Management module.

Skills

- **HTML5**
- **CSS3**
- **JavaScript**
- **React.js**
- **Node.js**
- **Express.js**
- **REST APIs**
- **Middleware**
- **Authentication & Authorization**
- **MongoDB**
- **Schema Design**
- **CRUD Operations**
- **Protected Routes**
- **Git / GitHub**
- **Postman (Basic)**
- **Problem Solving**
- **Debugging**
- **Clean Coding**

CURRENT LEARNING

Advanced Backend Development, React, Database Relationships, Software Engineering Best Practices
