Express.js
REST APIs
Middleware
Authentication & Authorization
MongoDB Atlas
Mongoose
CRUD Operations
Git / GitHub
Postman

PROFESSIONAL SUMMARY

Aspiring Software Developer with hands-on experience in building full-stack web applications using JavaScript, React, Node.js, Express.js, and MongoDB. I have worked on projects involving user authentication, form validation, REST APIs, JWT-based authentication, password hashing, database integration, and responsive frontend development. I have also worked with Git and GitHub for version control and project management. I focus on understanding how the frontend, backend, and database work together and prefer learning by building practical projects. Currently looking for an opportunity to apply my skills, improve through real-world development, and grow as a software developer.

PROJECTS

Task Flow Pro | Full-Stack Task Management Application

Technologies: JavaScript, Node.js, Express.js, MongoDB, HTML, CSS, JWT, bcrypt, Git, GitHub

- Developed a full-stack task management application with a structured frontend, backend API, and MongoDB database.
- Implemented user signup and login with password hashing using bcrypt and JWT-based authentication.
- Built protected API routes using authentication middleware to control access to user-specific data.
- Designed REST APIs for managing users and tasks and connected the backend with MongoDB.
- Added frontend form validation and integrated the application with the backend using HTTP requests.
- Used Git and GitHub for version control and managing the project development workflow.

Personal Portfolio Website

Technologies: React.js, JavaScript, HTML, CSS, EmailJS

Developed a responsive React-based portfolio to showcase my skills, projects, experience, and contact information.
